Although Frank Gehry is turning 80, he is in some ways more enthusiastic than a young man as he prepares to launch his new project, the Abu Dhabi Guggenheim, the largest Guggenheim in the world. Collaborating with his team and the director of the Solomon R. Guggenheim Foundation, Gehry is experimenting with new possibilities in the Cultural District of Saadiyat Island, or "Island of Happiness" in Arabic. Never satisfied with his previous architectural achievements and innovations, he always encourages his team to **"think outside of the box."**

The design concept of this new Guggenheim stems from a Middle Eastern desert scene. It looks like an old Arab town, with structures similar to streets, alleys, markets, and plazas. Clusters of cubical galleries are connected with pathways to provide ample room for art exhibition. When visitors walk through the museum complex, they will feel like they are experiencing a real Arab town, with artwork along the way. A modern version of a traditional Middle Eastern wind tower will bring in cooling air and abundant sunlight. The core of the museum complex will still be air-conditioned, but visitors won't feel isolated in the building. On the contrary, they can appreciate the art and the architecture in harmony with the surroundings. Although some people criticize Gehry's buildings as crude or even unfinished, Gehry himself aims to go beyond tradition, and help visitors to look at paintings and sculptures in a creative way.
